

A Power BI Project I made

Overview

This Power BI dashboard visualizes results from a survey of data professionals, focusing on salary satisfaction, work-life balance, favorite programming languages, job titles, and country participation.

Key Features

- Gauge Chart for Satisfaction:**
 - Salary and Work-Life Balance:** Quick view of how happy people are with their pay and work-life balance.
- Stacked Bar Charts for Programming Languages:**
 - Favorite Languages:** Shows which programming languages are most popular.
 - Job Titles:** Colors represent different job titles, making it easy to see who prefers what.
- Treemap for Country Participation:**
 - Geographical Distribution:** Visualizes how many people from each country participated.
 - Interactive:** Click on a country to see specific stats for that region.

Interactivity

- **Country Filtering:** Clickable treemap updates the rest of the dashboard to show country-specific data.
- **Color-Coded Titles:** Easy to compare preferences and satisfaction across different job roles.

Conclusion

This Power BI dashboard provides a clear and interactive way to explore survey results from data professionals, making it easy to understand key insights at a glance.
